

TETIANA KRAVCHUK

AI QA ENGINEER | AI QUALITY ENGINEER | LLM EVALUATION

Boston, MA • (978) 968-5469 • tetiana.kravchukqa@gmail.com • [linkedin.com/in/tetianakravchuk](https://www.linkedin.com/in/tetianakravchuk) • US Citizen

PROFESSIONAL SUMMARY

AI quality, QA automation, and data science professional with 10+ years of experience validating complex web, mobile, API, and fintech systems and an M.S. in Data Science, AI, and Machine Learning from Boston University. Combines production quality engineering with cross-team product analytics, PostgreSQL investigations, predictive modeling, and AI-feature evaluation. At World Publishing Houses, applies QA practices to AI-assisted research, source-grounded content, and multilingual data workflows.

CORE SKILLS

AI, Data Science & Quality: AI/LLM evaluation, evaluation rubrics, source-grounding validation, failure-mode analysis, product analytics, EDA, predictive modeling, feature engineering, experimentation, ETL, data validation, KPI reporting

QA Automation: test strategy, regression, integration, functional, UAT, risk-based testing, API/mobile/web testing, release validation, root-cause investigation

Technology: Python, SQL, Java, pandas, NumPy, scikit-learn, PostgreSQL, Appium, Selenium, Postman, Swagger/OpenAPI, REST Assured, Cucumber, TestNG, JUnit, PyTest, Docker, Jenkins, Git, Bitbucket, Sauce Labs, JMeter, Jira, Zephyr, TestRail

PROFESSIONAL EXPERIENCE

Lead QA Automation Engineer | Data Science Contributor

Apr 2022 – Present

Advisor360° • Weston, MA

- Design and maintain system integration and regression coverage for fintech web, mobile, and API workflows using Python, Appium, Docker, Swagger/OpenAPI, and CI/CD tooling.
- Partner with Product, Engineering, and Business stakeholders on a cross-team data science assignment, translating business questions into analyses, KPIs, and actionable recommendations.
- Execute SQL investigations and exploratory data analysis across enterprise PostgreSQL data to evaluate advisor behavior, customer engagement, workflow friction, anomalies, and AI-product adoption.
- Engineer features and validate predictive models for advisor productivity, client engagement, churn risk, and recommendation use cases using Python, SQL, pandas, and scikit-learn.
- Build ETL and data-validation workflows and collaborate with Data Engineering on data quality, schemas, and analytical data models.
- Evaluate AI features using adoption, latency, inference cost, user satisfaction, and productivity metrics; communicate findings through executive dashboards and stakeholder presentations.
- Investigate UI, API, log, and data failures; isolate root causes, assess regression risk, validate releases, and mentor QA engineers.

Founder | AI Quality & Data Product Engineer

Current

World Publishing Houses • Independent Project

- Build and quality-engineer a source-backed publishing intelligence platform spanning publishers, books, countries, languages, market coverage, and rights-related signals.
- Design and evaluate AI-assisted research, enrichment, and summarization workflows for citation accuracy, source grounding, factual consistency, completeness, duplicates, ambiguity, and unsupported claims.
- Create automated audits and regression checks for publisher coverage, work identifiers, cover matching, source context, search, discovery, multilingual content, and AI-agent workflows.

Lead QA Automation Engineer

Oct 2017 – Apr 2022

Peapod Digital Labs • Quincy, MA

- Led manual and automation quality activities for large-scale e-commerce web and mobile products across cross-functional Agile teams.
- Built Java-based Selenium and Appium frameworks and integrated regression coverage with TestNG, Maven, Bamboo, Sauce Labs, and Selenium Grid.
- Automated functional, integration, API, end-to-end, cross-browser, performance, and production smoke tests; analyzed logs, database queries, and failures to isolate defects and test instability.

Software QA Tester

Mar 2015 – Oct 2017

Infomatrix Global • Boulder, CO

- Built and executed Java/Selenium automated and manual tests across the SDLC; performed functional, regression, integration, API, load, and performance testing with Jenkins, ReadyAPI, BlazeMeter, and JMeter.

EDUCATION

M.S., Data Science, AI, and Machine Learning — Boston University

Computer Science & Programming — Quincy Community College • 2020

Degree in Agricultural Business — Agricultural University, Mykolaiv, Ukraine • 2011
